Wompa Mixes

Description

Wompa mixes are dance remixes of MHDC's songs by Grant.

Initially inspired by *When a fire starts to burn* by Disclosure, the mixes are dynamic and interesting whilst still making the audience groove.

Keytone & Dopaman aka Jeremy and Grant is the name they use when performing to self written and self made backing tracks with live vocals, flute ,harmonica, sax, guitar, synths, bass and percussion available to suit the gig.

Why *Keytone & Dopaman* ?

Two years ago, Jeremy found out he has type 1 Diabetes and has been successfully managing it since then by following a Ketos diet without insulin, hence *Ketone*.

Dopaman, refers to Dopamine which is in short supply for people with Parkinson's.

Singing, playing and performing increases Dopamine production and hence the name.

Do have a listen to some Wompa mixes below and let us know what you think. We're making more!
